

SYRIA (NF 137)

Season: Mid-season
Main characteristic/s: Very good flavour
Breeder: New Fruits s.a.s.

Characteristics of Syria (NF 137)

- Mid-season
- Good flavour
- Tolerant to the most common strawberry diseases

Cropping Season

Mid-season variety (+6 days Alba)

Fruit Quality

Very attractive, medium-large fruit, regular conical shape, very good consistency, bright red in colour. Very good flavour with a long shelf-life. Syria tolerates handling and transport well. Syria is suitable for processing and for growing in a continental climate. Fruit Yield

Suitable for open field cultivation for both fresh marketing and processing. Good results have been obtained in 2-year cultivation systems. Shows good tolerance to rain.

Plant Characteristics

Vigorous plant growth.

Disease Resistance

Tolerant to the most common strawberry diseases.

Use of the Variety

Syria is a robust plant, the fruits are resistant to rain damage and to diseases. Very good flavour. Syria is suitable for processing. Suitable for the continental climate.

Plant Supply

Syria is protected under Community (EU) Plant Variety Rights Grant No. 34840.
